

Department.: PNB

Course number: PNB 292W

Course title: Senior Research Thesis in Physiology and Neurobiology

Number of Credits: 3

Contact Person: J. Crivello

Catalog Copy: PNB292W. Senior Research Thesis in Physiology and Neurobiology Either Semester. Three Credits. Hours by arrangement. Prerequisite: Three credits of PNB299, which may be taken concurrently; ENGL 105 or 110 or 111 or 250. Open only with consent of instructor and departmental honors committee. Not limited to honors students. Special research or independent investigation for advanced undergraduates. Involves research and writing a thesis.

W Criteria: This course is the culmination of a student's independent study experience. To successfully complete this course a student must write a research thesis in a format consistent with the practices in the field. The thesis preparation is supervised, on an individual basis, by their faculty research advisor. Though each thesis is unique, each represents a substantial writing effort that has undergone multiple revisions. The thesis will be a minimum of 15 pages and undergo editing and revision. The student will not be able to pass this course without passing the W component .

Role of Grad Students: Senior thesis preparation is supervised by faculty. Graduate assistants do not have any role
